Art Unit: 1614

Restriction to one the following inventions is required under 35 U.S.C. 121.

Group I: Claims 1-19 drawn to methods for treating colon or rectal cancer employing an enhanced combination of irinotecan or derivatives with thalidomide or derivatives. If applicants elect this group, they are, further, required to elect a single enhanced combination of ~~one~~ *one* irinotecan or derivative with one thalidomide or derivative.

Group II: Claims 20-22 drawn to a method of reducing or eliminating gastrointestinal toxicity employing thalidomide alone.

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to one enhanced combination of drugs which would require many field of searches that would be an undue burden on the Examiner. Therefore, restriction for examination purposes is proper.

Applicant are required to make a provisional election even though this requirement is traversed.
